Brand Story

INTRODUCTION

Brand Guidelines Element

In these guidelines, you will find detailed instructions on how to use our brand assets correctly, including our logo, color scheme, typography, imagery style, and tone of voice. These elements are crucial in creating a cohesive and recognizable brand presence, whether it be in marketing materials, digital content, product design, or customer service.

Brand Guidelines Goal

Our goal with these guidelines is not to restrict creativity, but to provide a framework that ensures our brand is represented consistently and accurately, no matter where it appears. This consistency is key to building trust and recognition with our audience, which in turn, strengthens our brand's identity and market position.

| Heading Sizes

Logo

A decorative swirl graphic in a light gray color, starting from the bottom left and spiraling upwards and to the right, framing the heading size table.

h1	Heading 01	32 px
h2	Heading 02	28 px
h3	Heading 03	25 px
h4	Heading 04	22 px
h5	Heading 05	20 px
h6	Heading 06	18 px

Heading sizes on brand websites are flexible and vary by screen size and design context. While HTML tags (**<h1>–<h6>**) define structure, their visual sizes are customized—e.g., **<h1>** may range from **32px to 64px**. Sizes use relative units like rem for consistency and responsiveness.

Always follow the brand's typography scale for clarity and hierarchy.

| Imagery Style

Imagery style in art and design refers to the distinctive way that visual elements are used to create and convey meaning. It encompasses the specific techniques, methods, and aesthetic choices made by an artist or designer to craft images that resonate with viewers.
